Education

Bachelor of Technology in Electrical Engineering

Techno India College Of Technology

GPA: DGPA 8.07

01/2016 - 12/2020

Professional Summary

Experienced Angular developer with 4 years of expertise in building scalable web applications. Proficient in Angular frameworks and front-end solutions, adept at implementing industry best practices.

Skills Summary

Languages: HTML5, CSS3, JavaScript, TypeScript, Python3

Tools: Version Control (Git, Bitbucket), Command Line Interface (CMD, git-bash)

Technologies: Angular (v2 to v18), Micro Front End using Module Federation, Monorepo using nx, Restful API, Fast API

IDE: VSCode, IntelliJ, Pycharm

Deployment: Jenkins, Docker, Light Speed (LSE), Openshift, Apache Server

SCA: SonarQube, EsLint, SonarLint

Other Skills: Cyber Security, Linux/Unix CLI, Communication Skills

Certifications

Certified Mid Level Angular Developer

Experience

Tata Consultancy Services, Kolkata

System Engineer, Full-time

03/2021 - Present

- Collaborated with backend developers to integrate **APIs** and implement data fetching and manipulation functionalities.
- Conducted code reviews and provided constructive feedback to team members to improve code quality and maintainability.
- Contributed to the improvement of development processes and workflows by suggesting and implementing best practices and tools.
- Implemented coding practices that maximized **cybersecurity** standards, significantly reducing vulnerabilities in web applications.

Projects

Enterprise Risk Management Portal

TCS (Client CITI), Role: Angular Developer

01/2024 - Present

- Developed and maintained the codebase for the primary ERM portal application, which serves as the central host for all remote applications in the **Micro Frontend Approach**.

- Implemented robust coding practices to ensure scalability, maintainability, and efficiency of the ERM portal application.
- Collaborated with cross-functional teams to identify and address technical challenges, ensuring seamless integration of remote applications within the **Micro Frontend Architecture**.
- Designed and developed user interfaces in **Angular 16**, leveraging latest functionalities such as **standalone components**, **Angular signals**, **Forms ControlValueAccessor**, **Dynamic Components**, **Content projection**, etc to ensure a responsive and intuitive user experience.
- Implemented security measures and best practices to protect sensitive data and ensure compliance with industry standards.
- Conducted rigorous performance testing and optimization achieving SonarQube test case pass rates consistently above 85%. Ensured responsive design for various screen sizes to enhance user experience of the ERM portal.

Integrated Document Management System

08/2021 - 12/2023

TCS (Client: CITI), Role: Angular Developer

- Provided **Iframes** to all integrated applications, allowing them to perform document-related tasks using our application's interface.
- Implemented **UI components** and layouts using CITI's **UI libraries**, enhancing user interfaces for improved usability.
- Developed reusable **components** and **services**, facilitating their direct injection into different modules to provide consistent functionalities.
- Integrated with **Service APIs** by meticulously crafting and dispatching required payloads in various formats such as **JSON**, text, and form-data, while adeptly managing and interpreting the responses to ensure seamless functionality.
- Familiarized with and maintained **Dockerfiles** and other deployment-related components, ensuring adherence to the **CI/CD deployment strategy** in Jenkins.
- Successfully updated **Angular** versions from version 6 to version 14, ensuring compatibility and leveraging new features.
- Maintained **Sonar coverage** above 85%, ensuring code quality and adherence to best practices.
